

WINTER SURVIVAL

Memory game

Cut out all the cards. Spread them out picture down on a table. Take turns flipping over two cards. If you turn over an animal AND its correct major winter survival strategy (migrate, hibernate, or tolerate), you have a match. Keep those two cards. If they don't match, turn them back over, and it's the next player's turn. When all cards are taken, the player with the most cards wins.

hummingbird

whale

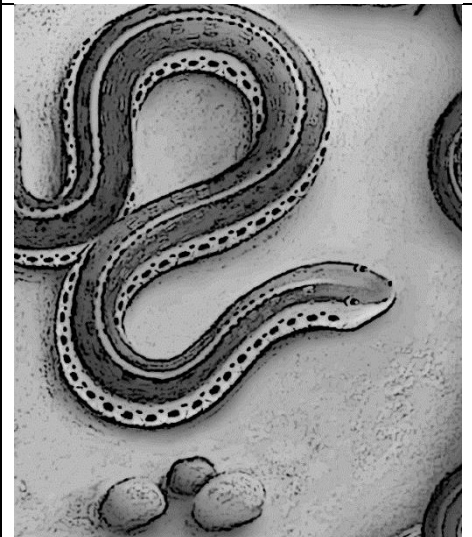

earthworm

black bear

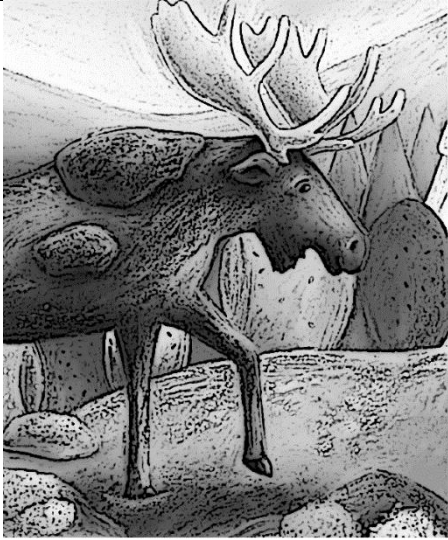

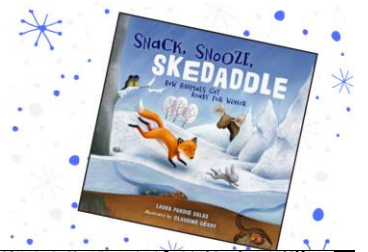

chipmunk

garter snake
